

Environmentally friendly products...

...Your choices are growing!

Look for this icon throughout our catalog for products that are energy efficient, reusable, compostable, or made from recycled or organic materials.

COMPOSTABLE PLA COLD BEVERAGE CUPS & LIDS

Clear cups made from U.S. grown corn designed to compost in a commercial facility in 45-60 days. Meets ASTM D6400 specifications.

[See page 122 for details](#)

COMPOSTABLE HOT BEVERAGE CUPS

100% compostable cups come in a variety of sizes. Meets ASTM D6400 specifications. Ecogrip cup sleeves are made of 100% recycled material, and wooden stir sticks are made from renewable resources.

[See page 122 for details](#)

COMPOSTABLE BAGASSE PLATES & BOWLS

100% compostable sugarcane fibers hold up when used with hot or cold foods. Meets ASTM D6868 specifications.

[See page 123 for details](#)

ENVIRONMENTALLY FRIENDLY LOW DENSITY CAN LINERS

Help reduce volume in landfills and are non-toxic to plant and animal life.

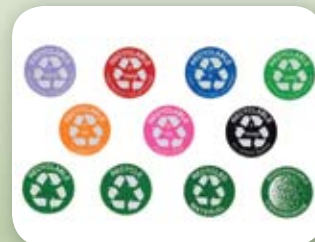

[See page 55 for details](#)

COMPOSTABLE FOOD CONTAINERS

Eco-friendly and cost effective alternatives to Styrofoam packaging that won't absorb liquids. Clear PLA food containers meet ASTM D6400 specifications and bagasse containers meet ASTM D6868 specifications.

[See page 121 for details](#)

RECYCLING SYMBOL LABELS

Preprinted glossy labels permanently stick to anything you want to be indicated as biodegradable, recycled, or recyclable.

[See page 82 for details](#)

REUSABLE NON-WOVEN POLY SHOPPING BAGS

Environmentally friendly bags stand up on their own. Designed for weekly use and made to last up to two years.

[See page 41 for details](#)

FLO-PAK® BIODEGRADABLE PACKING PEANUTS

Reusable fill is made of corn or wheat starch and is designed to decompose in the presence of air and water.

[See page 154 for details](#)

CLOROX® GREEN WORKS™ ALL-PURPOSE CLEANER

Cleaner is made from plant and mineral based ingredients. Safe for use on most surfaces.

[See page 120 for details](#)

BIOTUF™ COMPOSTABLE BAGS

Use bags to divert organic matter to composting facilities. Bag will decay into compost along with the contents.
