FLO-PAK® PACKING PEANUTS

Made of 100% recycled polystyrene. Figure-eight shaped loose fill is lightweight, cost-effective, and doesn't break or chip so contents arrive safely. Super 8® loose fill is stiffer than regular Flo-pak® peanuts and provides extra protection when shipping heavy or delicate products. Peanut color may vary based on the amount of recycled material used. Anti-static Flo-pak® will not cling to clothes or products and is ideal for shipping electronic components and other static-sensitive items. Use with our peanut dispensers (below right and opposite page).

FLO-PAK PACKING PEANUTS - COLORED

POLYSTYRENE PACKING PEANUTS

Light weight to save shipping costs. Moisture-proof peanuts can be used again and again.

Made from 100% recycled polystyrene, environmentally friendly peanuts can be recycled at facilities that accept polystyrene. Anti-static variety protects static-sensitive items from electrostatic discharge. Use with our peanut dispensers (right and opposite page).

BIODEGRADABLE PACKING PEANUTS

S-shaped, starch-based fill is just as effective as polystyrene but without the disposal problems. Completely water soluble, it breaks down instantly on contact with water without leaving toxic residue. Reusable and static-resistant with no CFCs. Use with our peanut dispensers (above right and opposite page).

SHIPPING RATES

SG - Standard ground shipping is needed for packages with a cubic size of less than 5,184 cubic inches (See below for cubic size calculation).

DW - Dimensional weight shipping is needed for packages with a cubic size of 5,184 cubic inches or greater. Calculate cubic size by measuring package length, width, and height in inches, rounding each to the nearest whole inch. Then multiply package length by width by height to determine cubic size.

Truck - Truck only shipping is needed for packages of less than 150 lbs. with a combined length and girth over 165".

FLO-PAK® BIODEGRADABLE PACKING PEANUTS

Environmentally responsible loose fill is made of corn or wheat starch and is designed to decompose in the presence of air and water. Reusable peanuts work with our loose fill dispensing systems (below and opposite page).

ASK MR. BAG

Q. Can I recycle my used packing peanuts?

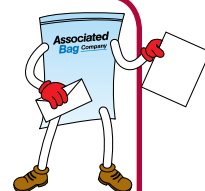

A. While you can't dump them in your recycling bin, there are several ways to keep your used packing peanuts from ending up in the trash:

Reuse them yourself. This method not only eliminates the energy needed to transport or recycle the packing peanuts, it also saves you money! Reusing packing peanuts lets you reduce your costs for packing supplies, while reducing the amount of raw materials used to produce peanuts. The loose fill dispensers on these pages make it easy to reuse the peanuts you receive.

Give them to others to reuse. If you are unable to reuse your own packing peanuts, there are likely many businesses in your area willing to accept them. Visit www.loosefillpackaging.com for information on businesses willing to take your used peanuts (You can also call the Plastic Loose Fill Council's Peanut Hotline at 800-828-2214). The collection sites are typically small packaging or gift shops that welcome the free packing material.

Recycle them. If there is no way to reuse your packing peanuts, recycling is recommended to keep them from going to a landfill. First, determine what materials can be recycled and where by contacting the department of public works in your community. For state recycling information, visit www.earth911.org, or call 800-CLEAN-UP.

Before you head to the recycling center, check to make sure that your peanuts can be recycled. While the biodegradable packing peanuts on this page resemble their polystyrene counterparts, they are in fact made from corn starch that dissolves in water. If you have this type of packing material, it can be safely disposed of by simply washing it down the drain.

INSTAPAK QUICK® RT FOAM PACKAGING AND QUICK START® KIT

Ideal for mailrooms, home based businesses, and internet businesses looking for supreme product protection without investing in warming equipment. Ready-to-use and provides excellent protection for fragile items. Bags expand up to 27 times their original size. Activate at room temperature. Quick Start® kit includes an assortment of 15 bags, three of each size.

1. Apply pressure to the "Press Here" area "A" to open the inside seal.

2. Pat parts "A" and "B" back and forth; bag will begin to expand.

3. Place the expanding foam-filled bag in the carton and nestle the product onto the cushion. Repeat the process as needed.
